

## The Thompson Difference

What's most important in choosing a technology partner for your business is the quality of service you receive. And that's the Thompson Networks Difference:

- Thompson Networks *listens*.
- Thompson Networks *explains*
- Thompson Networks *delivers*.

Our consultative approach and personal touch supported by highly skilled technicians and customer service personnel has fostered long-term relationships with companies throughout the Philadelphia, Lehigh Valley, and New Jersey areas since our inception in 1982.

Mobilize your staff  
with powerful tools  
and applications.

## Sprint Wireless Business Solutions

Thompson Networks delivers the best value in wireless with Sprint's mobility solutions, devices and plans so you can keep ahead of your growing business. The ability to connect to corporate information and applications is critical to business success. And when it comes to remote access, the faster the speed, the more productive your employees can be. The new Sprint wireless broadband data service is part of a broad portfolio of high-speed, wireless services that are helping to keep business data moving reliably and securely at all times.

- Wireless connection cards
- PDAs
- Smartphones

## Cabling

The technologies used today to communicate, whether voice, data, internet or video, have one thing in common – cable. Thompson Networks has over 40 years of combined design & engineering expertise in cabling infrastructure. We install reliable cable networks utilizing cable management to ensure low maintenance and to maximize limited space. Our experienced technicians are qualified in the following areas:

- Standard horizontal office cabling
- Multi-floor/Vertical cabling
- Outside buried & aerial cabling
- Sub-floor cabling

## Telephone Systems

As an authorized distributor of ESI and Vertical Comdial telephone systems, Thompson Networks offers a wide range of best-in-class traditional business telephone systems and Voice over IP telephony for businesses of all sizes. These manufacturers use cutting edge technology and offer many user friendly features such as:

- Voicemail
- Music on hold
- Presence management
- Automated attendant
- VoIP capabilities
- Unified messaging

Your business depends on its communications infrastructure and our solutions are designed to increase productivity, reduce costs, and make your organization run more efficiently.
